IMPORTANT RISK INFORMATION

Indications for Use: The Duo-Flow[®] Side X Side double lumen catheter is intended for short-term central venous access for hemodialysis, apheresis and infusion.

Contraindications: The catheter is not intended for any purpose other than indicated in these instructions. The Duo-Flow[®] Side X Side double lumen catheter is intended for short-term (less than 30 days) use. Do not use this catheter in thrombosed vessels or for subclavian puncture when a ventilator is in use. Do not use this catheter when:

- The patient's body size is insufficient to accommodate the implanted device.
- The superficial or deep tissue will not permit adequate device stabilization and/or access.
- There are known physiological limitations that will not allow placement of the device.
- The patient has known or suspected allergies to any of the materials in the device.
- The patient has received significant radiation at the intended exit site or tunnel.
- The patient has severe chronic obstructive lung disease.

Refer to Instructions for Use provided with the product for complete instructions, warnings, precautions, and contraindications. Observe all Instructions for Use prior to using products. Failure to do so may result in patient complications.
