Catheter Only Contents: (1) Catheter (2) Dilator (1) Attachable Suture Wing (3) End Cap (1) Chart Sticker

Basic Set Contents: (1) Catheter (1) Introducer Needle (1) Guidewire (2) Dilator (1) Scalpel (1) Adhesive Wound Dressing (1) Attachable Suture Wing (3) End Cap (1) Chart Sticker

Max Barrier Contents: (1) Catheter (1) Safety Introducer Needle (1) Guidewire (2) Dilator (1) Safety Scalpel (1) Adhesive Wound Dressing (1) Attachable Suture Wing (3) End Cap (3) 4x4 Gauze (1) Chlorhexidine (1) Tinted Chlorhexidine (3) 10cc Syringe (1) 5cc Lidocaine (3) Pre-Filled Syringes (1) Filter Straw (1) Lidocaine/Saline Sticker Sheet (1) 3-0 Curve Suture (2) Safety Hypodermic Needle (1) Hemostat (1) Full Body Max Barrier Drape (1) XL Gown (1) Bouffant Cap (1) Surgical Gloves (1) Needle Stick Pad (1) Steri-Strip (1) Face Mask (1) Surgical Face Mask (1) Chart Sticker

IMPORTANT RISK INFORMATION

Indications For Use: The Trio-CT[®] Triple Lumen Catheter is indicated for use in attaining short-term (less than 30 days) vascular access for hemodialysis and apheresis. The third internal lumen is intended for infusion, power injection of contrast media and central venous pressure monitoring. The catheter is intended to be inserted in the jugular, femoral or subclavian vein as required. The maximum recommended infusion rate is 5ml/sec for power injection of contrast media. Catheters 30cm and above are intended for femoral placement.

Contraindications: This catheter is intended for short-term (less than 30 days) vascular access only and should not be used for any purpose other than indicated in these instructions.

Refer to Instructions for Use provided with the product for complete instructions, warnings, precautions, and contraindications. Observe all Instructions for Use prior to using products. Failure to do so may result in patient complications.

medCOMP[®]

Indicated for short-term hemodialysis and apheresis.
Third lumen provides additional access for multiple therapies.

trio-ct

TRIPLE LUMEN CATHETER

INTERNAL LUMEN

17 ga lumen is independent from dialysis lumens and exits distal to the dialysis lumens.

CATHETER TIP

Tapered catheter tip design.

MAX BARRIER TRAY

A. Bouffant Cap, B. Surgical Gown, C. Face Mask with Shield, D. Full Body Drape

Power Injectable Lumen

Extension is labeled "Power Injectable."

Third lumen decreases the need for additional needle sticks.

Provides access for infusion of medication, blood draws, central venous pressure monitoring, and power injection of contrast media.

Allows injection of contrast media at a maximum of 5 mL/sec.

Average recirculation rate of 2% for normal flow, and when arterial and venous lumens are reversed

Flow rates up to 400 ml/min and a pressure of 80 mmHg for straight and curved extension catheters

MRI safe

ID tags indicate maximum injection rates

Priming volume shown on catheter clamps

Curved lengths up to 24cm and straight lengths up to 30cm

Depth markings aid with catheter insertion to desired depth
